## WANT NEW RULES.

#### Pennsy Officials Suggest a New Plan of Scoring Points.

At the recent meeting of the intercolleglate Athletic Association a petition was the petitioners-the Athletic Association of the University of Pennsylvania-that it will be called up at the proper time. The petition provides for a change of the rules as to the counting of points in the coming annual track and field championships. Heretofore only four places counted, and it is now intended to increase the count to five places, which, if adopted, will give the smaller colleges a much better chance to make a creditable

showing. One of the members of the committee has been in communication with several of the Yale athletes, and it has met with their approval. The new rule will no doubt meet with considerable resistance by Harvard, but it is fair to all when the chances of an entrant scoring are figtred out. The pick of the athletes from all parts of the country compete, and are trained especially for these events.

EFFECT OF ATHLETICS. Attendance at Colleges Is Increased by the Encouragement of Sports. Dean Meikeljohn, of Brown University, in his annual report dealing with col-

lege registration differs with President Eliot, of Harvard, by atributing the in-creased registration of Brown's students, in a measure, to athletic prominence, especially when that prominence comes through victories. President Eliot, in his recent report, said that success or failure in sports has had no influence on regis-tration at Harvard or Yale.

Dean Meikeljohn says: "The experience of Brown does not agree with that of Harvard, for marked gain has followed

athletic victory.
"In 1889 Brown's registration included about 280 students. From this time the number increased rapidly, until it reached close to 500 in 1836, and has remained near that figure since that time. "In 1896 and 1898," he continues, "Brown won the college championship at base-ball, and in 1990 was second only to
